

Harvansh Singh

harvanshsingh4321@gmail.com | +91 6398577978 | Bareilly

CAREER OBJECTIVE

Aspiring Machine Learning professional with hands-on experience in Python, data analysis, and ML projects, seeking an internship to apply and expand my skills on real-world problems while contributing to innovative AI solutions.

EDUCATION

B.Tech, Computer Science

2023 - 2027

Shri Ram Murti Smarak College Of Engineering, Technology And Research, Bareilly

TRAININGS / CERTIFICATIONS

Data Science & Data Analytics

Dec 2025 - Present

WsCube Tech, Virtual

- Completed an in-depth Data Science and Machine Learning training program
- Covered statistics including probability, hypothesis testing, correlation, and central limit theorem
- Performed data cleaning, preprocessing, encoding, feature scaling, and outlier handling
- Implemented supervised learning algorithms such as Linear & Logistic Regression, Decision Trees, and KNN
- Worked with classification techniques, confusion matrix, and imbalanced datasets
- Applied unsupervised learning methods including K-means, Hierarchical Clustering, and DBSCAN
- Learned model evaluation, cross-validation, and hyperparameter tuning
- Gained hands-on exposure to feature selection techniques like forward and backward elimination

Data Analytics

Nov 2025

TechVision Technologies IT Training & Placements, Bareilly

- Worked on data analysis using Excel, Python, and Power BI
- Created dashboards and visualizations for data-driven insights
- Performed data cleaning and preprocessing tasks

PORTFOLIO

[Portfolio link ↗](#)

PROJECTS

[Smartphone Usage / Addiction Detection System ↗](#)

Sep 2025 - Dec 2025

- Built a machine learning-based system to analyze smartphone usage patterns
- Performed data preprocessing, feature extraction, and exploratory data analysis
- Trained classification models to detect excessive or addictive usage behavior
- Evaluated model performance using suitable evaluation metrics

[Auto-Capture Selfie Using Smile Detection ↗](#)

Oct 2024 - Jan 2025

- Developed a computer vision-based system to automatically capture selfies when a smile is detected
- Implemented face detection and smile recognition using Python and OpenCV
- Performed image preprocessing and real-time camera input handling
- Enhanced user experience by automating photo capture functionality

EXTRA CURRICULAR ACTIVITIES

- - Provided remote technical assistance on Python and data-related projects for an international student (Lithuania).
 - Supported project development through code optimization, debugging, and documentation.
 - Developed cross-cultural communication and collaborative problem-solving skills.

ADDITIONAL DETAILS

- • Completed hands-on ML and Data Analytics projects • Assisted in international academic projects • Continuous learner in AI and Machine Learning
